Graduation or Internship Project

Interaction Design for Patient Engagement Digital Tools

Philips Research is a global organization that helps Philips introduce meaningful innovations that improve people’s lives. We provide technology options for innovations in the area of health and well-being, targeted at both developed and emerging markets. Positioned at the front-end of the innovation process, we work on everything from spotting trends and ideation to proof of concept and – where needed – first-of-a-kind product development.

One of the areas of research that we are currently working on is patient participation and involvement. We are developing digital solutions that will engage patients across the care journey. We are working in the domains of oncology and cardiology. We are looking for a design student for graduation or internship. The student will work on user interface visualizations, create innovative concepts to engage patients, and support the testing of these concepts. We expect the student to have good graphic design skills.

Expected Duration: 5-6 months

The student will get a monthly stipend during the duration of the project.

If you are interested to apply, please send your CV to: pavan.dadlani@philips.com
