**Details**

At Lighting Design Collective (www.ldcol.com), we’re a multicultural team of architects, designers, software coders and digital artists, passionate about light and the way it affects people’s lives.

Our portfolio covers cutting-edge lighting design services such as digital content creation, control software development and innovative design strategies designed and developed for world-class projects in more than 20 countries. We believe in creating and communicating ‘meaningful interactions’ in a wide range; from concept presentation for the clients to unfolding the user’s experience. This is of great importance specially when it comes to responsive/interactive projects which has been a focus for our practice, since the beginning.

---
