- [ ] Other, respectively. [Enter other category here]

**Location of the internship**

Eindhoven, The Netherlands

**Internship period**

September 2017 – January 2018

**Application deadline**

---

## DETAILS

**Description of the internship**

The GGzE (Geestelijke Gezondheidszorg Eindhoven) eLab is an incubator for innovative solutions for mental health care. One of these solutions is an interactive mirror. This mirror can be used in different periods of the customer journey during a treatment at GGzE, as well as in other contexts. The mirror could be used as a tool for prevention, during the treatment or aftercare. Examples of contexts are clients with autism, dementia, depression, eating disorders and more. At the eLab professionals in mental healthcare work together in a co-creative way with designers, software engineers and experience experts.

The next step in the process is to find several case studies, design interactions with the mirror, programme and validate these in context. For this we are currently looking for an intern to support our team! During this internship you will be coached by an Industrial Design alumnus.

**Student’s responsibilities**

- Interested in developing your skills and knowledge in programming, interaction design, user testing
- An affinity with mental health care
- Proactive, motivated and independent

**The company is offering**
