QuickStart

Start up and log into a class

Step 1: Welcome screen
Switch the clicker on with the power button. The welcome screen will appear. Here you can enter a personal message, e.g. your name or student ID. You can do this via the ‘Greeting’ option in the menu.

Step 2: Log in (optional)
After the welcome screen the clicker will automatically search for a class and log in. If this does not happen, you can do it manually by entering the channel number of the class concerned. You will see this on the beamer screen.

Step 3: Start screen
Once you have successfully logged in, you will see this screen. The number top left is automatically generated.

Answering questions

Step 1: Enter answer
When a lecturer asks a question, the following screen will appear. Fill in your answer and press the Enter key.

Step 2: Confirmation
After you have pressed Enter, ‘OK’ will appear in the small ring to show that the answer has been received. You will always have at least one chance to change your answer. The lecturer will decide how many times you can change your answer.

Additional information

• The sticker on the back of the clicker is necessary to identify the clicker. Do not remove it!
• The sticker is unique to each student. You may not use another clicker than the one registered in your name at the NSC.
• The clicker is guaranteed for three years. If it is defective, you can hand it in at the NSC. The guarantee does not cover impact damage.
• You can contact the Education and Student Service Center with any other questions.
